

Breakout Room 2

WATER SECURITY AND PROSPERITY

Result of Discussion at Breakout Room 2

- Group 1: Water Sanitation for Low Income Communities, Smart Water Cities Utilization of Digital System, Resilience Against Climate Change, Water Quality Degradation, and Clean Water and Health
- Group 2: Resilience, DRR, Innovation, Sustainability
- Group 3: Water, Food, and Energy; Water Saving; Water Monitoring; Water Reallocation; Transboundary Water Management and Conservation
- Group 4: Water Quality/Quantity, Ground Water Security, Appropriate Technology, Data Management for Water and Sanitation, Community Engagement
- Group 5: Transboundary Cooperation, Water Resource Management, Water Supply and Sanitation, Flood Management, and Governance

Result of Discussion at Breakout Room 2

- ~~1. Water Sanitation for Low Income Communities~~
2. Smart Water Cities Utilization of Digital System
3. Resilience Against Climate Change
- ~~4. Water Quality Degradation~~
5. Clean Water and Health
- ~~6. Resilience~~
- ~~7. DRR~~
- ~~8. Innovation~~
9. Sustainability
10. Water, Food, and Energy
11. Water Saving
- ~~12. Water Monitoring~~
13. Water Reallocation
14. Transboundary Water Management and Conservation
15. Water Quality/Quantity
16. Ground Water Security
17. Appropriate Technology
18. Data Management for Water and Sanitation
19. Community Engagement
- ~~20. Transboundary Cooperation~~
- ~~21. Water Resource Management~~
22. Water Supply and Sanitation
- ~~23. Flood Management~~
24. Governance

Input to Mentimeter

1. Smart Water Cities Utilization of Digital System
2. Resilience Against Climate Change
3. Clean Water and Health
4. Sustainability
5. Water for Food
6. Water for Energy
7. Water Saving
8. Water Reallocation
9. Transboundary Water Management and Conservation
10. Water Quality/Quantity
11. Ground Water Security
12. Appropriate Technology
13. Data Management for Water and Sanitation
14. Community Engagement
15. Water Supply and Sanitation
16. Governance

Final Keywords

1. Resilience Against Climate Change (13 Voters)
2. Smart Water Cities Utilization of Digital System (7 Voters)
3. Water Quality/Quantity (6 Voters)
4. Water for Food (5 Voters)
5. Appropriate Technology (5 Voters)
6. Data Management for Water and Sanitation (5 Voters)

Total: 64 Voters

6 Final Keywords chosen by: 41 Voters

Final Result
